In the editorial by Fourey et al, “Prevalence and Clinical Implication of Double Mutations in Hypertrophic Cardiomyopathy Revisiting the Gene-Dose Effect,” which initially published online April 18, 2017, and appears in the April 2017 issue of the journal (*Circ Cardiovasc Genet*. 2017;10:e001685), corrections were needed.

In Table 3, the annotations Ar, Es, and NEO were removed from the Remarks column and references to these annotations were deleted from the footnote.

Additionally, the following statement should appear as follows:

All of the remaining 5 cases found in the literature with 2 P/LP variants according to the current analysis had a severe phenotype with presentation during infancy or childhood.

These corrections have been made to the final version of the article, which is available at [http://circgenetics.ahajournals.org/content/10/2/e001685](http://circgenetics.ahajournals.org/content/10/2/e001685).

The publisher regrets this error.
