In the article by Chasman et al, “Genetic Determinants of Statin-Induced Low-Density Lipoprotein Cholesterol Reduction: The Justification for the Use of Statins in Prevention: An Intervention Trial Evaluating Rosuvastatin (JUPITER) Trial,” which appeared in the April 2012 issue of the journal (Circulation: Cardiovascular Genetics. 2012;5:257–264), Figure 1 shows a boxplot for associations at the 4 main loci in the paper. The lower left panel of Figure 1 is the same as the upper right panel (ABCG2 gene), rather than showing information for a different locus (LPA gene).

The lower left panel of Figure 1 has been corrected in the online version of the article. It now shows information for the LPA gene. The authors regret the error.
Correction
